WHAT'S INCLUDED?

Mackie EM91C Condenser Microphone

This standard professional quality microphone condenser is perfect for home-based studios as well as larger studios. It is reliable and sturdy in its construction

Audio Recorder: Tascam DR-40X

Your handheld audio recorder can handle recording podcasts and audio interview, sampling sessions sound effects and even live music.

Headphones: Samson's SR450

Your headphones offer exceptional sonic quality with a sturdy yet lightweight design. Expect long-listening comfort and secure fit with a wide range of frequency.

One of One Waterproof Case

Protect your precious audio equipment from harm with this especially rugged waterproof storage case. The case is constructed with professional quality to prevent impact, moisture and microscopic dust from reaching your equipment, all while making podcasting on the go easier.

Microphone Stand

Your podcast kit comes with a sturdy microphone stand to serve as vessel for your mic. It has a compact and straight forward design perfect for a desktop or any surface. The height is adjustable so customize it to meet your needs.

SD Card: 32 GB Sandisk

Your SD card is water, shock and temperature proof to protect your files. The high-speed SD card has a built-in write protect switch for maximum protection.

Video Instructions Included.
